Dear John Sumser,

Greetings from the Hudson Valley. Amongst the current crop of late 20th Century endeavors, I am opening an Ecological Design Arts Gallery in Cape May, New Jersey. As a feature attraction, I would like to offer The **Millennium Whole Earth Catalog** as one of the products.

As you may recall, I contributed $15,000 to the TMWEC development. My request to you is that I would like to be able to translate that into access to a corresponding wholesale amount of product.

I assume you got a chance to screen the film I conceived and produced called "**Ecological Design: Inventing the Future**". I hope you approve of the context in which The Whole Earth Inc. was portrayed. In any case, I would love to enter into a dialogue with you about some of the ideas contained within the film.

I look forward to talking with you soon.

Sincerely,

Chris Zelov
